

## MYYA SANDERS

Rock Hill, SC | Myyanoelle@gmail.com | (803) 209-7029 | [LinkedIn](#) | [GitHub](#)

### PROFESSIONAL SUMMARY

---

Engineering student building toward a career in cybersecurity analysis, drawn to the field's blend of technical problem-solving and real-world impact. Known for a strong work ethic, quick learning curve, and detail-oriented approach under pressure. Actively growing technical depth through coursework and campus involvement, with a long-term goal of specializing in defensive security for critical infrastructure.

### EDUCATION

---

University of South Carolina — Columbia, SC  
*Bachelor of Science in Engineering*

*Expected May 2029*

### EXPERIENCE

---

IT Support Student Assistant — University of South Carolina

*January 2026 – Present*

- Install and maintain structured cabling systems, including keystone jacks and patch panels, to ensure reliable and secure network connectivity
- Troubleshoot new technical challenges in a fast-paced support environment, applying analytical and problem-solving skills to maintain operational continuity
- Diagnose and resolve hardware, software, and system issues, providing technical support to 50+ staff members while maintaining system security and integrity for campus users

### PROJECTS

---

Personal Portfolio Website

- Designed and deployed a responsive portfolio website using HTML, CSS, and GitHub Pages
- Applied version control and web design principles to establish a professional digital presence showcasing technical projects and development workflow

Vulnerable vs. Hardened Small Business Network

- Designed and implemented a small business network environment, creating both vulnerable and hardened configurations to analyze cybersecurity risks and mitigation strategies.
- Configured network infrastructure including routers, switches, workstations, servers, and VLAN segmentation to simulate a real-world business environment.
- Performed vulnerability assessments to identify security weaknesses in network devices, operating systems, and services.

### ACTIVITIES & LEADERSHIP

---

Cybersecurity Club — Member

*August 2026 – Present*

- Attended hands-on workshops covering social engineering tactics, including how phishing emails are constructed and identified, to build practical threat-awareness skills
- Preparing to apply foundational offensive/defensive techniques in upcoming Capture the Flag (CTF) competitions and collaborative security projects

MAPP Program (Mentorship and Academic Support) — Mentee

- Participated in mentorship and academic development activities focused on leadership, accountability, and long-term goal planning

### SKILLS

---

Programming: Python, Java, HTML, CSS, UNIX/Linux

Cybersecurity Fundamentals: Threat & Risk Assessment, Fraud Mitigation, Secure Systems Configuration, Access Control, Cybersecurity for Critical Infrastructure

Tools & Platforms: GitHub, Eclipse, Unity, Wireshark, VS code, Ubuntu

### CERTIFICATIONS

---

- CESER: Cybersecurity for Energy Infrastructure
- Dell Client Foundations (2025)
